Office of International Education

TAIWAN

VISA APPLICATION TIPS & RESOURCES

The Embassy or Consulate of your Host Country in the US will be best able to guide you regarding what is required based on your individual situation.

If you need a visa is dependent on your citizenship, program length, host country, and purpose of study.

For additional country-specific information on immigration requirements such as visas for U.S. Citizens, see the [U.S. Department of State's Country Specific Information](#). Citizens of countries outside of the United States may wish to consult similar information provided by their own governments.

If you do require a visa for your program, the Office of International Education strongly recommends that you start this process early.
